Download Fiery Command WorkStation 5.6

Thank you for your interest in Fiery® Command WorkStation® 5.6 included with the Fiery Extended Applications (FEA).

Please click on one of the links below to begin the download of the Fiery Software Manager, which will guide you through the rest of the download process. Please see the [installation document](#) for additional information.

Windows Download

Mac Download

The current Fiery Extended Applications Package 4.2.0.291 includes the following application versions:

- Fiery Command WorkStation 5.6.0.24
- Hot Folders 3.6.0.15
- Fiery Remote Scan 6.2.0.09
- Fiery Software Manager 2.0.0.15

Technical Notes

If your Fiery server is not connected to the Internet, you can download the Fiery Extended Application Package v4.2 from the [EFI Download Center](#) and then copy the software package to the Fiery server for installation.

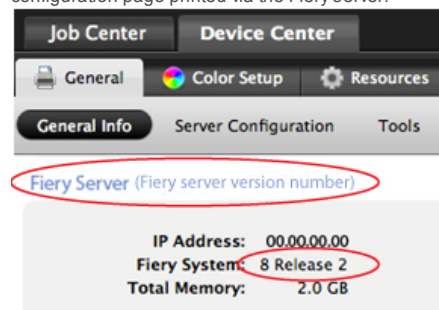

- How can I find the Fiery Extended Application Package v4.2 in the EFI Download Center?**
- Installation to a Fiery Server not connected to the internet**

If you are installing directly on a Fiery System 6, 7, 8 or 8 R2 server, Command WorkStation 5.6 with Fiery Extended Applications 4.2 will not install. You will only be able to install these additional applications on a client workstation, or on a Fiery server running System 9 or later.

If you wish to install Command WorkStation directly on a System 8 Release 2 Fiery server, you will need to install [Command WorkStation 5.3](#).

How do I find out which Fiery System and Fiery server version I have?

Your Fiery System version is listed in the Device Center General Information tab in Command WorkStation. This information also is accessible on the Fiery configuration page printed via the Fiery server.

Find out if your Fiery-Driven printer supports [Command WorkStation 5.6](#).
